

WEAPONS OF MASS DESTRUCTION (WMD) V PRE-CONFERENCE

JANUARY 22-JANUARY 25, 2004

Thursday, January 22, 2004

BTIST WORKSHOP (DAY ONE OF FOUR)

CLINICAL TRACK (MENTAL HEALTH) : BioTERRORISM TRAUMA INTERVENTION SPECIALISTS TRAINING

Instructors: Jennifer Baggerly, PhD, LMHC
Diane F. Fojt, MSc, BS, REMT-P
J. Eric Gentry, MA, PhD(c), MT, CAC, CTS
Nadine D. Mescia, MHS

Primary Target Audience: Department of Health Employees and other Public Health Practitioners; Community Mental Health Professionals, LMHC, LCSW, School Counselors, Psychologists, Psychiatrists, Mental Health Nurses and Health Care Professionals; Physicians, and Nurses.

Secondary Target Audience: First Responders: Police, Fire Fighters, and EMS; Clergy and Chaplains; Community Volunteers; Public Health, Mental Health, Nursing, and Medical Students

This course is limited to **30** participants. A waiting list of up to eight participants will be established. Advanced registration is required. Participants **must** agree to attend the entire 4-day course.

This course is specifically designed to prepare public health practitioners, health care providers and mental health professionals to effectively offer disaster mental health interventions to survivors, family members, witnesses, and responders of bioterrorism and other major disasters. Participants will develop the requisite knowledge, skills, and competency to intervene effectively with survivors and witnesses of bioterrorism, and other critical incidents and traumatic events.

This course provides foundational, research-driven knowledge regarding the etiology, prevention, management, and treatment of traumatic stress. Participants are taught, through didactic instruction and active and experiential learning exercises, to utilize the important skills of critical incident stress management and other interventions designed to prevent and/or mitigate traumatic stress disorders in terrorism survivors, family members, witnesses and responders of trauma. Participants will develop skill in assessment, triage, trauma stabilization, individual and group defusing, debriefing, stress management, grief intervention and cultural competence. Additionally, this course helps to minimize the risk to the interventionist for developing the negative effects of providing trauma intervention by teaching compassion fatigue prevention and resiliency skills. Participants who successfully complete this program, will receive a certificate in critical incident stress management (CISM) from the International Critical Incident Stress Foundation (ICISF), and will be highly encouraged to participate as a voluntary member of their regional public health critical incident support team.

HAZMAT/DECON WORKSHOP (DAY ONE OF THREE)

HAZARDOUS MATERIALS AWARENESS CERTIFICATION

Instructors: Steven J. O’Keefe, FPED, CEM

Target Audience: Hazardous materials responders at the awareness level that may be employed by public or private sector organizations, such as fire or emergency services, law enforcement, emergency management, public works, public health, utilities, transportation, contractor, and hospital organizations.

The First Responders at the Awareness Level are personnel who are likely to witness or discover a hazardous materials emergency or, in the course of their normal duties, may be the first person(s) on the scene of an emergency involving hazardous materials. First responders at the awareness level are expected to recognize that a hazardous material is present, protect themselves, call for trained personnel, and secure the area. The most important duty for some of these personnel is to make proper notification to begin the emergency response sequence.
